Our Consortium

Our Results

EcoGreen creates teaching material to be used in vocational education.

Our modules cover the topics:

- Green Economical Strategies
- Green Cities
- Sustainable Forestry
- Green Entrepreneurship

In addition to the teaching material the projects provides:

- a handbook for teachers
- podcast episodes
- a blended learning course
- an interactive online platform

EcoGreen aims at supporting teachers in vocational education to implement the topic of sustainable economical education.

Our strategy increases the professional profile of teachers and supports their students to gain green competences.

Our results are being published on our website and are freely accessible in English, Finnish, German, and Polish.
